

How to submit one submission?

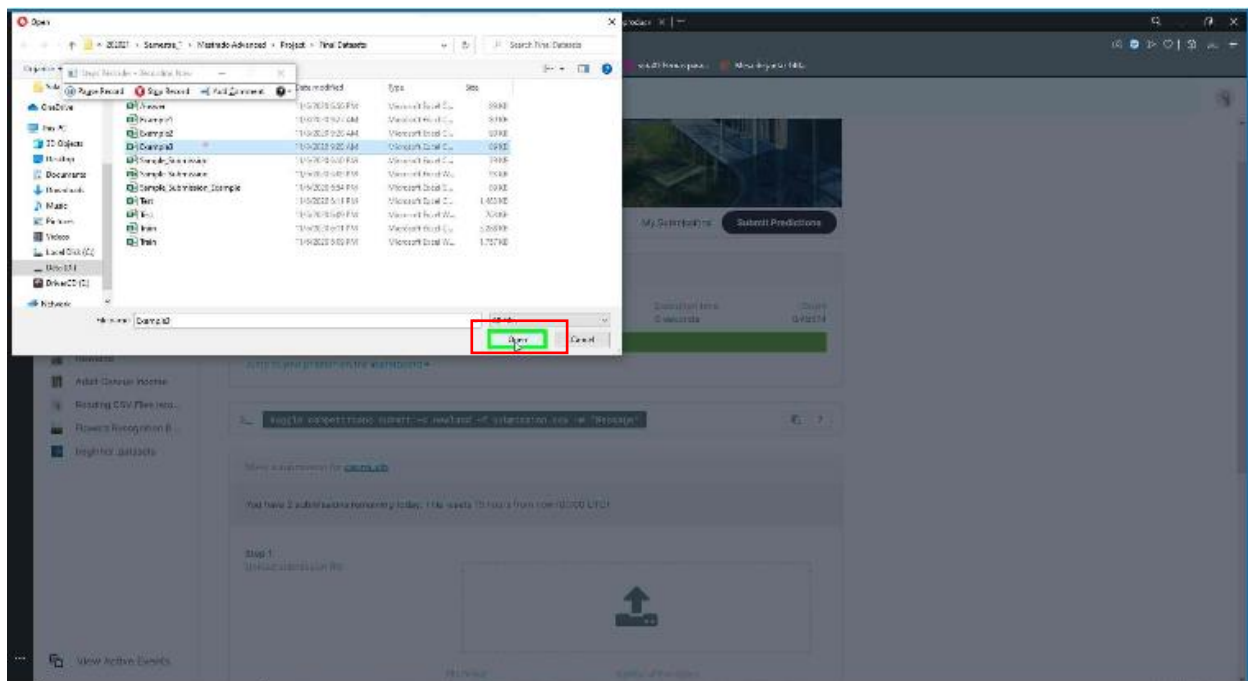

1. Click on Submit Predictions

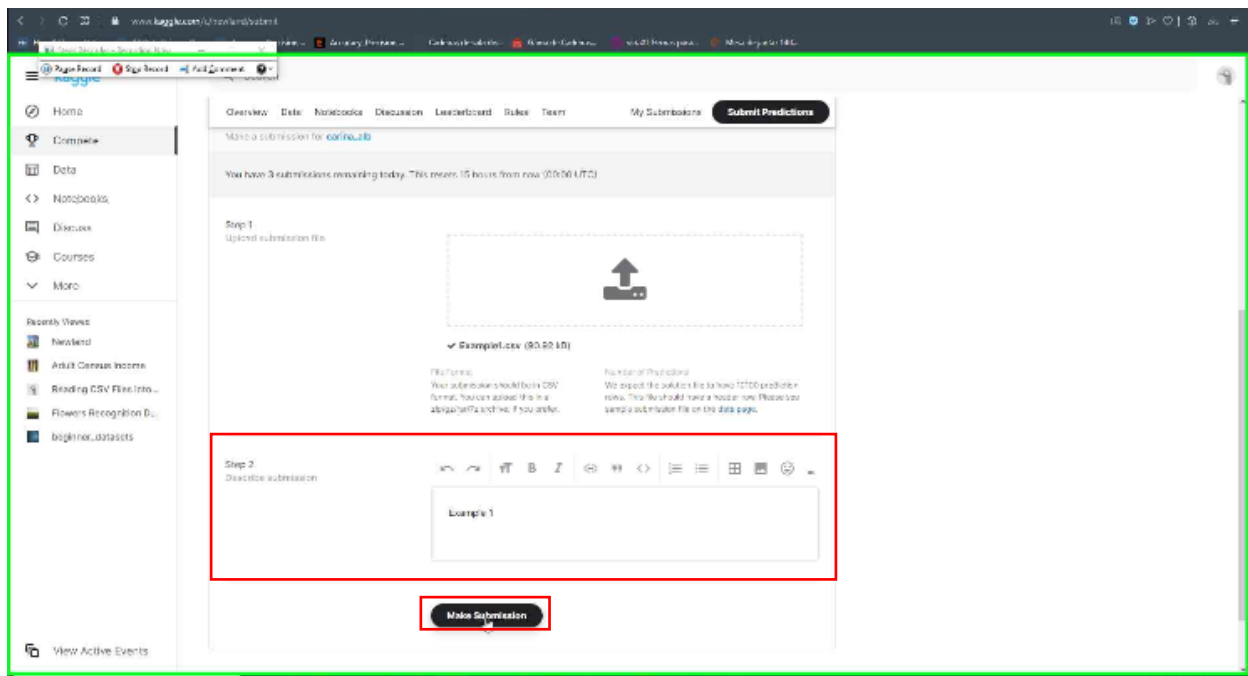

2. On "Upload Submission File" click "Upload File"

3. Select the file you want to upload

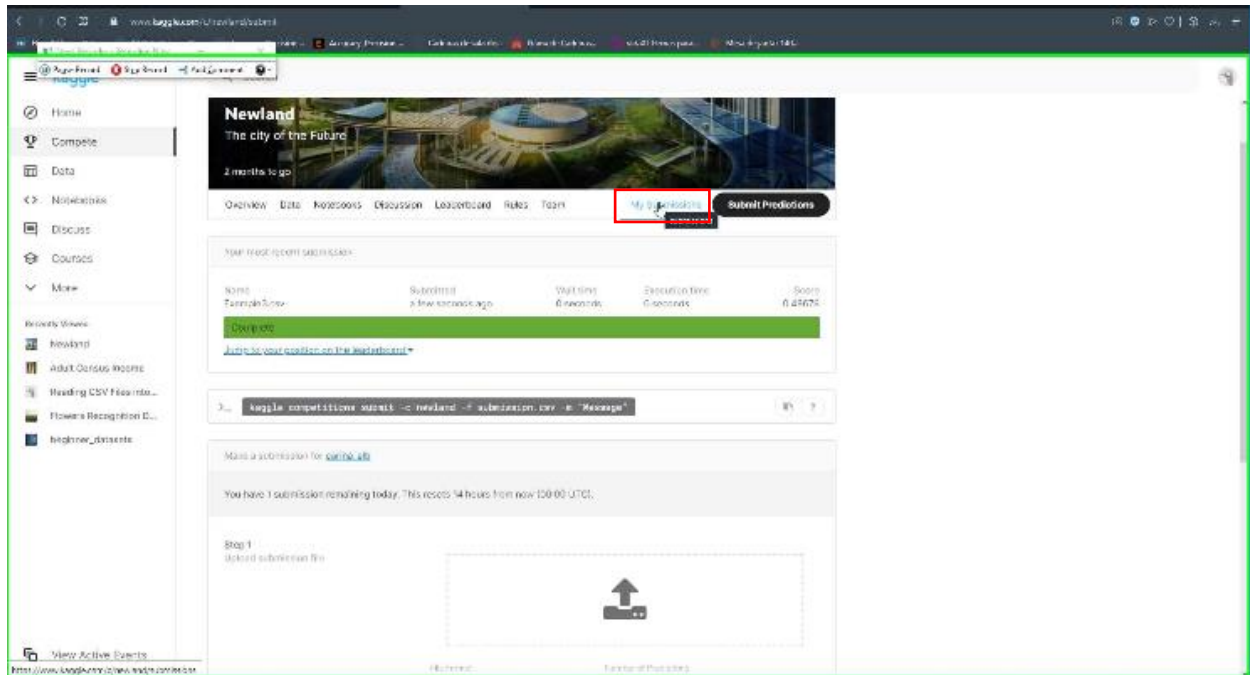

4. If you wish (it will be better for you to understand what are the changes on each submission), you can write a description associated to the submission file. After that, you can click on “Make submission”

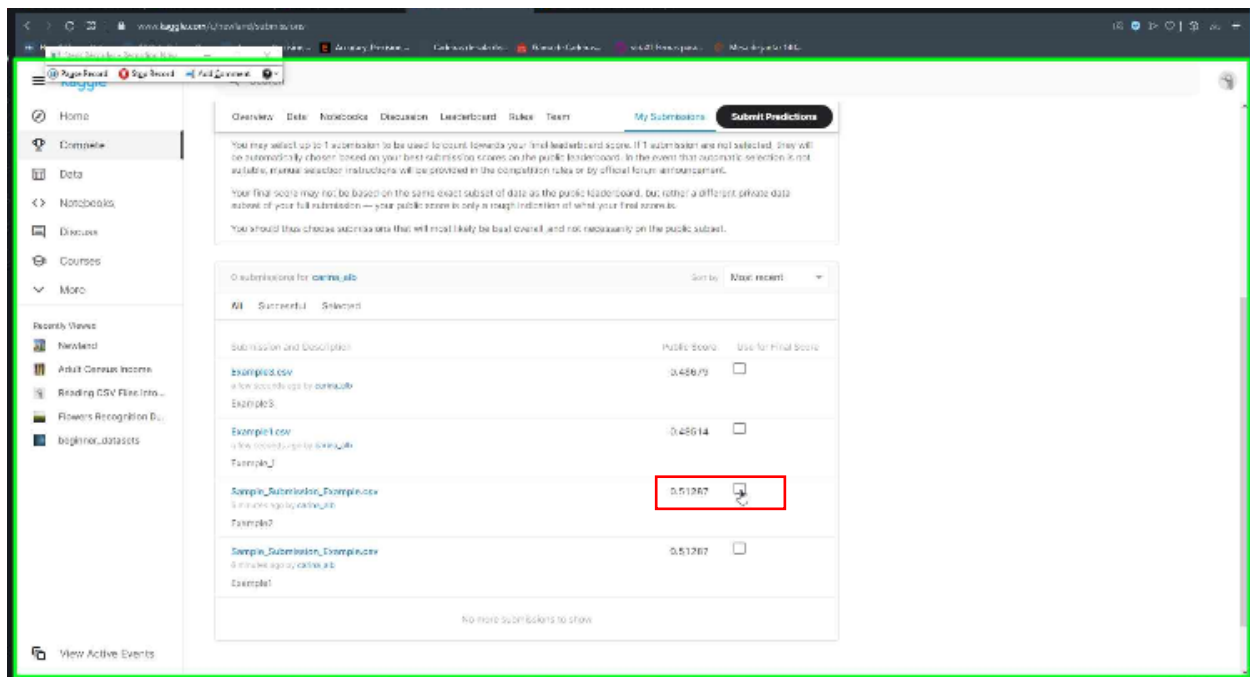

How to Select just one submission in the end?

1. Click on “My submissions”

2. Select one and just one option in the list of your submissions to be defined as your final submission (this should be the version where the results are obtained using the notebook you are going to deliver us).

Selected extensions updated

You may select up to 1 submission to be used to ensure it meets your final leaderboard score. If 1 submission is not selected, it will be automatically chosen based on your final submission's score on the public leaderboard. In the event that automatic selection is not available, money selection extensions will be provided in the competition rules or by official forum announcement.

Your final score may not be based on the same exact subset of data as the public leaderboard, but rather a different private data subset of your full submission — your public score is only a rough indication of what your final score is.

You must then choose submissions that will meet Only in test event, and not necessarily on the public subset.

0 submissions for carminal0

Sort by: Most recent
